

Building Capacity in Psychosocial & Hopeful Care Learning & Knowledge Translation Program

Looking to enhance your skills and core competencies in psychosocial care?

Curious how you can support hopeful care?

This learning program will help healthcare providers enhance their skills in providing psychosocial care and promoting a culture of hope for persons with stroke, their families and caregivers.

To participate in this program:

1. Complete the 8 e-learning modules (~2.5 hours) on the Toronto Stroke Networks' website (for professionals/ education and professional development) or by clicking the link for each module below

1. [Introduction to Psychosocial Care](#)
2. [Interprofessional Collaborative Care](#)
3. [Self-Care for Healthcare Providers](#)
4. [Impact of Stroke on Psychosocial Health and Well-Being](#)
5. [Co-creating Hope](#)
6. [Establishing Rapport](#)
7. [Effective Therapeutic Communication](#)
8. [Building Resiliency](#)

2. Register for the Virtual Practice Based Small Group Learning Session [HERE](#) (May 20th, 2025, 8:30am-12:00pm)
