## Transcranial Doppler (TCD): Practical Applications in Stroke

**Wednesday March 4<sup>th</sup>, 2026, 0800-0900h EST**

**Objectives:** Upon completion participants will:

1. Explain the fundamental principles of Transcranial Doppler (TCD) and its clinical relevance in stroke assessment and what elements are outlined in the Canadian Stroke Best Practice Recommendations.
2. Analyze case-based scenarios to illustrate the clinical application and interpretation of TCD finds in stroke management.
3. Discuss practical considerations for implementing TCD in acute and ongoing stroke care.
