

The North & East GTA Stroke Network Presents:

Provincial Stroke Rounds

Dr. Houman Khosravani, MD, MSc, PhD, FRCPC

Stroke Specialist, Neurointensivist
Medical Director of Stroke Care
Sunnybrook Health Sciences Center

Dr. Christine Hawkes, MD, FRCPC

Vascular and Interventional Neurologist
Medical Director, Neurovascular Unit
Sunnybrook Health Sciences Center

Stroke Resuscitation Simulation: Building High-Performing Teams Through Crisis Resource Management

May 13, 2026, 0800-0900h

Objectives: Upon completion, participants will be able to:

1. Describe the principles of Crisis Resource Management (CRM) and how they apply to hyperacute stroke care, including team communication, cognitive load management, and closed-loop communication during code stroke activations.
2. Identify practical strategies for implementing stroke resuscitation simulation training across neurology, emergency medicine, and critical care teams to improve team performance and resident competency.
3. Recognize the impact of simulation-based education on acute stroke metrics, provider comfort, and interprofessional collaboration.
